A measurement systems analysis (MSA) is a thorough assessment of a measurement process, and typically includes a specially designed experiment that seeks to identify the components of variation in that measurement process.* from Measurement Systems Analysis, 4th Edition, 2010, AIAG. The manual does say that these criteria alone are not an acceptable practice for determining the acceptability of a test method.SC-FORM-SCH-431 (Sections 1 & 2 only) (Sections 1-8) (All Sections) SECTION 7 – DIMENSIONAL RESULTS 7.1 There is a signed and dated Dimensional Inspection Report included in the submission.October 2012. This month's newsletter is the third in a three-part series on using the ANOVA method for a Gage R&R study. This method uses analysis of variance to analyze the results of a Gage R&R study instead of the classical Average and Range Method
