Buy Colorology: The Study of the Science of Color by Caryl Dennis (ISBN: 9780962784507) from Amazon's Book Store. Everyday low prices and free delivery on eligible orders. Colorology: the Science of Color is based on the same principle. Each of the seven colors vibrate at a characteristic frequency; anything you can see (visible light) must also be vibrating at one of those frequencies. Our physical bodies “tune in to” — or receive and resonate in a particular way — each of the seven colors of the rainbow. Sunlight contains all of those frequencies and ...INTRODUCTION Colorology: The Study of the Science of Color was initially written and published in 1990, and has remained in print for over eleven years.
