

# Download Current And Emerging Issues In Cancer Pain

Department of Anesthesiology and Critical Care Medicine and Department of Oncology Division of Pain Medicine The Johns Hopkins Hospital 550 North Broadway Baltimore, Maryland 21205 Twenty-six detailed papers on the problems of pain in patients with cancer and on potential and available treatments. Other issues addressed include pathophysiologic considerations, depression, suicide, affective and perception components, relevant pharmacology, clinical trials, clinical assessments and ethics. Only two U.S. medical institutions (the Fred Hutchinson Cancer Research Center in Seattle and New York's Memorial Sloan-Kettering Cancer Center) maintain established cancer pain services and engage in extensive, peer-reviewed investigations into the causes and effects of cancer pain.
