

Download Food To Some Poison To Others The Food Allergy Detection Program

A food allergy is an abnormal immune response to food. The symptoms of the allergic reaction may range from mild to severe. They may include itchiness, swelling of the tongue, vomiting, diarrhea, hives, trouble breathing, or low blood pressure. This typically occurs within minutes to several hours of exposure. When the symptoms are severe, it ...CSPI ranks the safety of food additives—from acetic acid to yellow prussiate of soda—in this definitive glossary of the chemicals used to flavor and preserve our foods. Food fraud is the act of purposely altering, misrepresenting, mislabeling, substituting or tampering with any food product at any point along the farm-to-table food supply-chain. Foodborne illness usually arises from improper handling, preparation, or food storage. Good hygiene practices before, during, and after food preparation can reduce the chances of contracting an illness.
