Optical fiber is used as a medium for telecommunication and computer networking because it is flexible and can be bundled as cables. It is especially advantageous for long-distance communications, because light propagates through the fiber with much lower attenuation compared to electrical cables. An employee's exposure to any substance listed in Tables Z-1, Z-2, or Z-3 of this section shall be limited in accordance with the requirements of the following paragraphs of this section.

Introduction. The present work consists of two distinctly separate parts. Firstly, I cite some new experiments, completed since the appearance of my book which was submitted for printing in 1974 and which was published in 1975: *Biological Evidence of Low Energy Transmutations* (Maloine Publications, Paris, 1975).
