

Download Introducing Research And Evidence Based Practice For Nurses

Evidence-based nursing (EBN) is an approach to making quality decisions and providing nursing care based upon personal clinical expertise in combination with the most current, relevant research available on the topic. Major difficulties arise when introducing evidence and clinical guidelines into routine daily practice. Data show that many patients do not receive appropriate care, or receive unnecessary or harmful care. Foundations of Nursing Research. Nurses must understand research in order to effectively participate in the provision of evidence-based nursing care. Contribution to Emergency Nursing Practice • This quality improvement project adds to the emergency nursing literature by demonstrating that the evidence-based practice (EBP) of AIDET (the acronym for the 5-step program: acknowledge, introduce, duration, explanation, and thank you), Hourly Rounding, and Bedside Shift Report (BSR) can have a ...
