Feigned insanity is the ...A mental disorder, also called a mental illness or psychiatric disorder, is a behavioral or mental pattern that causes significant distress or impairment of personal functioning. Such features may be persistent, relapsing and remitting, or occur as a single episode. Many disorders have been described, with signs and symptoms that vary widely between specific disorders. 'Mental disorder' is difficult to define. Generally speaking, mental disorders are conditions that involve either loss of contact with reality or distress and impairment. Besides, not all of what's considered mental illness today would necessarily fit the term 'madness', but it makes sense to group them together, so a more generalized term is preferable. Laypeople might still use the term from time to time. Many of us with mental illness are hurt by that term, though.
